

EUROPEAN FEDERATION OF BIOTECHNOLOGY

Serving Biotechnologists in Europe and Beyond

> 30.000 personal members

100 institutional members from across Europe

12 regional branch offices

Mission

Established by European scientists in 1978, the European Federation of Biotechnology (EFB) is Europe's non-profit federation of National Biotechnology Associations, Learned Societies, Universities, Scientific Institutes, Biotech Companies and individual biotechnologists working to promote Biotechnology throughout Europe and beyond.

The Aims of EFB are to advance the responsible use of the Life Sciences, to promote research at the cutting edge of biotechnology, to provide a forum for interdisciplinary and international cooperation, to improve scientific education and to facilitate dialogues between scientists and the public.

The Mission of EFB is to promote the safe, sustainable and beneficial use of Nature's resources through the application of knowledge in the Life Sciences and biotechnology. Membership is open to all organisations and individuals involved in Biotechnology with an active interest in and a desire to play a central role in the European biotech community.

Activities

- Promote international and interdisciplinary cooperation throughout Europe and beyond
- Foster collaboration between academia, research and industry
- Stimulate innovation & technology transfer
- Promote the socially and ethically sound application of biotechnology
- Organize workshops, meetings and the biennial European Congress on Biotechnology
- Promote education & training
- Improve understanding of safety issues in biotechnology
- Promote public understanding of biotechnology
- Prepare position papers, white papers, briefings, reviews and reports
- Maintain good contacts with and serve in an advisory capacity to the European Commission
- Disseminate information on EC funding opportunities and science policy issues
- Promote and defend the sustainable use of biotechnology

Exclusive Benefits

- Access to a unique community of more than 30,000 scientists and professionals in the field
- Invitation to an annual strategic policy meeting.
- Consultation regarding EFB strategy and future activities.
- Submit articles and position papers for publication in the EFB Journal New Biotechnology.
- Reduced fees for advertising in New Biotechnology and other EFB publications.
- Listing in the EFB Directory on the EFB website.
- Preferential advertising rates in EFB Newsletters that are distributed to more than 30,000 members.
- Decreased charges for exhibition space at the European Congress of Biotechnology.
- Other rights of an EFB Institutional Member, as listed in the EFB Statutes.
- Preferential registration fees for specific EFB events.
- Contribute to position papers submitted to the European Commission.
- Voting rights at the annual EFB General Assembly.

New Biotechnology is the official journal of the European Federation of Biotechnology and is published bimonthly. It covers both the science of biotechnology and its surrounding political, business and financial milieu.
