

Dear Colleagues of Plants Biotechnology,

From 17th to 21st April 2006, the VII International Symposium on Plant Biotechnology will take place at the Institute of Plants Biotechnology from Villa Clara, Cuba, as a continuity of the preceding ones since 1991.

The main objectives of the VII Symposium are to contribute to the development and application of the current advances in the Plant Biotechnology field and to allow the interchange of experiences among the participant Specialists.

Topics:

- Plant mass propagation
- Genetic transformation
- Genomics
- Bioinformatics
- Cell Tissue culture
- Plants as Bioreactors
- Plant genetic improvement by biotechnology
- Biosafety and public perception
- Intellectual property in plant biotechnology

Workshops:

- Musa Biotechnology
- Forest trees and fruit biotechnology
- Bioinformatics
- Interaction plant-pathogen
- Plant Secondary Metabolites
- Biofabrics

Presentations of Papers:

- Plenary lectures
- Workshops
- Posters

Official languages:

Spanish and English

Inscription fee:

Delegates: 200 CUC

Students: 100 CUC

Accompanist: 150 CUC

Postgrade students: 120 CUC

*All payments should be made in Cuban Convertible Pesos (CUC). (See <http://www.bc.gov.cu/>)

The inscription fee includes the materials to be used at the symposium, access to the scientific activities and welcoming cocktail.

To the accompanists the inscription fee includes the symposium program and participation at the welcoming cocktail.
